DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagano (6,159,856).

With respect to claims 1 and 4, Nagano discloses forming a high melting-point metal layer (16) over an entire surface including over the device isolation region (12) and the first and second diffusion layers (13c/13d) and first and second MOS transistors (See fig. 13); selectively introducing a silicon element (17) into the high melting-point metal layer on the device isolation region; silicidizing by thermal treatment the high melting-point metal layer having introduced therein the silicon element on the first and second diffusion layers and the device isolation region (Col. 7, lines 38-42); and selectively removing the high melting-point metal layer to be silicidized remaining unreacted (Col. 7, lines 45-49).

With respect to claims 2 and 5, Nagano discloses wherein the high melting-point metal layer is a cobalt layer (Col. 7, line 33).

With respect to claims 3 and 6, Nagano discloses wherein said introduction is done by an ion implantation method (Col. 7, lines 35-37).
